

2019 CONSUMPTION AND ACTIVITIES MAIL SURVEY  
(CAMS 2019)  
Final, Version 1.0  
August 2021

Data Description and Usage

### Conditions of Use

By registering for access to HRS Public Release data, the User agrees to all of the following:

- Make no attempts to identify study participants.
- Not to transfer HRS Public Release data to any third party other than staff or students for whom you are directly responsible except as indicated below.
- Not to allow others to use your username and password to access this site.
- To certify the destruction of any downloaded Public Release data file as well as any data files derived from the downloaded file when requested to do so by the Health and Retirement Study.
- To include the following citation in any research reports, papers, or publications based on Public Release data:

*In text:*

"The HRS (Health and Retirement Study) is sponsored by the National Institute on Aging (grant number NIA U01AG009740) and is conducted by the University of Michigan."

*In references:*

"Health and Retirement Study, ([insert Product Name]) public use dataset. Produced and distributed by the University of Michigan with funding from the National Institute on Aging (grant number NIA U01AG009740). Ann Arbor, MI, (year)."

- To include the following citation in any research reports, papers, or publications based on any Public Release data file tagged as "Early" or "Preliminary":

"This analysis uses Early Release data from the Health and Retirement Study, ([insert Product Name]), sponsored by the National Institute on Aging (grant number NIA U01AG009740) and conducted by the University of Michigan. These data have not been cleaned and may contain errors that will be corrected in the Final Public Release version of the dataset."

- Please note that although it is necessary to include the above citations to the HRS in any publications, it is not necessary to associate your publications with the HRS grant in [PubMed](#).
- Provide information regarding any research product (dissertation, thesis, journal article, book, book chapter, report, etc.) based on data obtained from the Health and Retirement Study by sending an electronic copy to [hrrspublications@umich.edu](mailto:hrrspublications@umich.edu).
- Report immediately to the Health and Retirement Study at [hrrsquestions@umich.edu](mailto:hrrsquestions@umich.edu) any disclosure of study participant identity as well as any discovery of flaws or errors in the data or documentation files.

Notify the Health and Retirement Study through use of the update function provided at this site or by electronic mail directed to [hrrsquestions@umich.edu](mailto:hrrsquestions@umich.edu) of changes in your electronic mail address, postal address, telephone number, organizational affiliation or organizational status.

## Data Description and Usage

### 1. Overview

In the fall of 2019, questionnaires assessing individual activities and household patterns of consumption were mailed to a sub sample of the Health and Retirement Study (HRS). The 2019 Consumption and Activities Mail Survey (CAMS), was a continuation of the longitudinal CAMS that started in 2001. For further information about CAMS see the HRS website, documentation, data descriptions and "off-year" studies: <http://hrsonline.isr.umich.edu>.

The HRS is funded under a cooperative agreement between the National Institute on Aging (NIA) and the Survey Research Center at the University of Michigan. The HRS is designed to study labor force, health, and family transitions of the U.S. population aged 51 and older, and the impact of those transitions on economic resources, claims on structured programs such as Social Security, Medicare, and Medicaid, and informal assistance and transfers to and from family members.

The National Institute on Aging (NIA) provided funding (U01 AG009740) for the 2019 CAMS. The CAMS survey was conducted by the Survey Research Center (SRC), at the Institute for Social Research (ISR), at the University of Michigan.

By receiving the dataset, you agree to use it for research and statistical purposes only and to make no effort to identify respondents. In addition, you agree to send us a copy of publications you produce based on the data. (See [Registration and Downloading the Data](#) at the end of this document for additional details).

#### 1A. The Sample Interviewed in the 2019 CAMS

In the fall of 2019, CAMS questionnaires were mailed to a sub-sample of HRS respondents (n=8,049). The sample consisted of everyone invited to participate in the 2017 CAMS who was alive in 2019 and who had not been permanently removed from the HRS or CAMS samples. New spouses of the 2017 CAMS sample members were included (even if they did not participate in the 2017 CAMS). In 2017 a part of the Late Baby Boom (LBB) cohort was included in CAMS--40% of households who were finalized on their baseline HRS 2016 interviews by June 30, 2017. In 2019, 40% of the remaining LBB households finalized on their baseline HRS 2016 interviews after June 30, 2017 were added to CAMS.

Of the 8,049 questionnaires, 5,692 were "full" and 2,357 were "partial" versions. The 2019 CAMS data file contains 4,666 records.

For information about prior samples and response rates for the CAMS please see the [CAMS data description from 2017](#).

### **1B. 2019 CAMS Sections**

As indicated earlier, there were two versions of CAMS questionnaires in 2019. The “full” version contained three sections:

- Section A** Activities
- Section B** Consumption
- Section C** Demographics

**Section A**, Activities, was designed to measure and identify the nature of individual activities, their quantity and their quality. The activities component of the CAMS allows for describing activity patterns and permits the investigation of different types of activities and how specific types of activities are affected by health, family and economic transitions in later life and, in turn, how activities affect health and well-being.

**Section B**, Consumption, was designed to obtain information about the level and pattern of expenditures of sampled households. The consumption questions of the CAMS, coupled with the panel data of the HRS, allows for assessing a variety of important practical and theoretical issues, including how consumption patterns are affected by health, wealth, retirement and public and private supports.

The “partial” version of the 2019 questionnaire contained Section A, only.

### **1C. Changes to the 2019 CAMS Questionnaire**

For the 2019 CAMS, small changes have been made to two questions as shown below in bold:

- A1 Watching programs or movies/videos on TV, **computers, etc.**
- B6 In the past twelve months, has your household purchased a computer/**laptop/tablet**?

**The following list describes 2017 CAMS questions that were deleted in 2019 CAMS.**

<b>2017 Variable Name(s)</b>	<b>Description</b>
B41M1-M9	POSITIVE FINANCE EARLY LIFE
B42M1-M13	NEGATIVE FINANCE EARLY LIFE
B43	RE-DO SPENDING AT AGE 45
B44a	SPEND/SAVE MORE AGE 45
B45aM1-M11	WHICH SPEND/SAVE MORE
B44b	SPEND/SAVE LESS AGE 45
B45bM1-M7	WHICH SPEND/SAVE LESS

The following list describes questions that were added in 2019 CAMS.

**2019 Variable Name(s) Description**

B41	HOUSEHOLD SPENDING PAST 6 YRS
B42a1-B42a7	WHY HOUSEHOLD SPEND LESS
B42b1-B42b7	WHY HOUSEHOLD SPEND MORE
B43a	ENJOY GOING OUT TO EAT
B43b	ENJOY TRAVELING
B43c	ENJOY LEISURE ACTIVITIES
B43d	ENJOY HAVING NEW CLOTHES
B43e	ENJOY HAVING A NEW CAR
B43f	ENJOY HAVING NEW APPLIANCES
B43g	ENJOY GIVING FINANCIAL SUPPORT
B44	OTHER PEOPLE'S SPENDING
B45	SATISFIED WITH PRESENT SITUATION
B46	SATISFIED COMPARED TO SIX YEARS AGO
B47	HOUSEHOLD SPENDING CONSTRAINED
B48	CONSTRAINED COMPARED TO SIX YEARS AGO

The following list describes questions that were moved and renamed in 2019 CAMS.

2019 Variable Name	Description	2017 Var. Name
B49	RETIREMENT STATUS	B46
B49a	RETIRED TOTAL SPENDING	B46a
B49b	RETIRED HOW MUCH CHANGE	B46b
B49d	NOT RETIRED TOTAL SPENDING	B46d
B49e	NOT RETIRED HOW MUCH CHG.	B46e
B50a	SPENDING ON TRIPS	B47a
B50b	SPENDING ON CLOTHES	B47b
B50c	SPENDING ON EATING OUT	B47c
B50d	SPENDING ON HOME/HOUSEHOLD	B47d
B50e	SPENDING ON ENTERTAINMENT	B47e
B50f	SPENDING ON AUTO EXPENSES	B47f
B51	PCT CHANCE FUTURE NO MONEY	B48
B52	WHO ANSWER QUESTIONNAIRE	B49
B53	SECTION B TIME	B50

**1D. File Structure**

The 2019 CAMS Final Release (Version 1.0) data are at the respondent level. Respondent-level files contain questions that were asked of all respondents about themselves or their household (or were answered by a proxy for the respondent if the respondent was not able to fill out the questionnaire). The data file contains one record for each respondent or proxy who filled out and returned a 2019 Consumption and Mail Activities questionnaire.

Each section of 2019 CAMS contains a question asking who answered the survey questions (A44, B52 and C4). Therefore, analysts can determine if the respondent to whom the questionnaire was sent completed the questionnaire, or if the spouse or partner of the respondent, or some other proxy completed the questionnaire.

The data file is called CAMS19\_R, loosely translated as: Consumption and Activities Mail Survey 2019, with the "\_R" designating the file is at the respondent level.

The CAMS19\_R data file contains 4,666 cases (including those who answered the "full" questionnaire and those who answered the "partial" questionnaire) and 209 variables.

The primary Identification variables (IDs) are:

HHID	HOUSEHOLD IDENTIFIER
PN	PERSON NUMBER

Secondary Identification variables are:

QSUBHH	2018 SUB HOUSEHOLD IDENTIFICATION NUMBER
QPN_SP	2018 SPOUSE/PARTNER PERSON NUMBER

Records in the data files are sorted in order by HHID and PN. The variable PN refers to the respondent to whom the questionnaire was mailed. The variable QPN\_SP is the person number of the respondent's spouse/partner from the HRS 2018 core data. Identification variables in the HRS 2019 CAMS Final Release are stored in character format. For further information about HRS identification variables and merging data, see the [Data Description for the HRS 2002 Core](#).

### **1E. Data Quality**

Recoded or Constructed variables

Most of the variables in the 2019 CAMS data mirror the questions in the CAMS questionnaire. However, questions that allowed for multiple mentions have been recoded. Respondents were instructed to check "all that apply" for A36, B42A, B42B and C1. These questions have been recoded into one variable for each mention (for example B42AM1, B42AM2, etc.).

We have added several variables (B7d, B8d, B18d, B19d, B20d, B21d and B22d) to indicate where respondents have combined amounts for either property or utility costs. For example, when respondents reported that electricity was combined with their water and heating costs, the amount in B20\_19 includes water and heat for these respondents and B21 and B22 are left blank.

### Consistency

The data will have some inconsistency. Respondents did not always follow the correct skip patterns and in most instances, their "incorrect" answers were preserved. Likewise, there were times when respondents interpreted questions involving percentages in different ways.

### Extreme values and missing data

While cleaning the data, when extreme or unlikely values were encountered, the hard copies of the questionnaires were checked to determine if errors were introduced during the data entry process. If the respondent reported the extreme value, the extreme value appears unchanged in the data. For example, at question A45, if a respondent reported that it took 0 minutes to complete Section A, a zero will appear in the data; conversely, if a respondent reported that it took three hours (i.e., 180 minutes) to complete the section, then 180 minutes will appear in the data. Likewise, at questions like A5 ("sleeping and napping last week"), respondents might report 0 hours, while others might report doing so for 163 hours. The exception to the rules above is that we top-coded the following variables:

```
A1-A20, A34, A35a, A36a, A37a (hours per week):  
if xxx >168 then xxx = 168
```

```
A21-A33, A35b, A37b (hours per month):  
if xxx >730 then xxx = 730
```

```
A35c, A37c (hours in the last year):  
if xxx > 8760 then A35c = 8760  
if xxx > 8760 then A37c = 8760
```

```
A38, A39 (days in the last 12 months):  
if A38 > 365 then A38 = 365  
if A39 > 365 then A39 = 365
```

When respondents did not provide an answer to a question, their answers were treated as missing. There are no codes for "don't know" or "refused". Instead, codes of "9" (or "99", etc. depending on the variable width) have been used to designate "answer not given" when respondents did not answer a lead in question or when a lead-in question was answered, but they did not provide answers to the follow-up question(s). An example would be (B1) "PURCHASE/LEASE AUTO", where respondents do not provide the "make" of the car (B1a). In the prior example, responses were coded as "99" or "answer not given." Respondents, for whom the question was inapplicable, are coded as blank or dot.

## **2. Distribution Files**

The following extensions are used for the different types of distribution files:

- .da for data files,
- .sas for SAS program statements,
- .sas7bdat for "ready-to-use" SAS files,
- .sps for SPSS program statements,
- .sav for "ready-to-use" SPSS files,
- .do for Stata DO statements,
- .dct for Stata dictionary statements,
- .dta for "ready-to-use" Stata files, and
- .txt for codebook files.

For example,

CAMS19\_R.da contains ASCII data from Sections A, B, and C.  
CAMS19\_R.sas contains corresponding SAS program statements,  
CAMS19\_R.sas7bdat contains "ready-to-use" data in SAS format,  
CAMS19\_R.sps contains corresponding SPSS program statements,  
CAMS19\_R.sav contains "ready-to-use" data in SPSS format,  
CAMS19\_R.do contains corresponding Stata DO statements,  
CAMS19\_R.dct contains corresponding Stata dictionary statements,  
CAMS19\_R.dta contains "ready-to-use" data in Stata format, and  
CAMS19\_R.txt contains the ASCII codebook.

The 2019 CAMS Final Release data are provided in ASCII format, with fixed-length records. Use the associated SAS, SPSS or Stata program statements to read the data into the analysis package of your choice. In addition, you are encouraged to download the codebook file (CAMS19\_R.txt) and the data description (this document).

## **3. Program Statements**

The data are provided as SAS (.sas7bdat), SPSS (.sav) and Stata (.dta) "ready-to-use" files and in ASCII format. Each ASCII data file comes with associated SPSS, SAS, or STATA program statements to read the data. Files containing SPSS statements are named with a .sps extension, those with SAS statements with a .sas extension, and those with STATA statements with .do and .dct extensions.

### **3A. Using the Files with SAS**

To create a SAS system file for a particular dataset, two file types must be present for that dataset -- .SAS program statement files and .DA data files.

To create a SAS system file, load the \*.SAS file into the SAS Program Editor.

If the \*.SAS file is located in "c:\cams2019\sas" and the data file is located in "c:\cams2019\data", you can run the file as is. A SAS system file (\*.SAS7BDAT) will be saved to directory "c:\cams2019\sas".

If the files are not located in the specified directories, you will need to edit the \*.SAS file to reflect the proper path names prior to running the file.

### **3B. Using the Files with SPSS**

To create an SPSS system file for a particular dataset, two file types must be present for that dataset -- .SPS program statement files and .DA data files.

To create an SPSS system file, open the \*.SPS file in SPSS as an SPSS Syntax File.

If the \*.SPS file is located in "c:\cams2019\spss" and the data file is located in "c:\cams2019\DATA", you can run the file as is. An SPSS system file (\*.SAV) will be saved to directory "c:\cams2019\spss".

If the files are not located in the specified directories, you will need to edit the \*.SPS file to reflect the proper path names prior to running the file.

### **3C. Using the Files with Stata**

To use Stata with a particular dataset, the following three file types must be present for that dataset -- .DCT files, .DO files, and .DA data files.

Files with the suffix .DA contain the raw data for Stata to read. Files with the suffix .DCT are Stata dictionaries used by Stata to describe the data. Files with the suffix .DO are short Stata programs ("do files") which you may use to read in the data. Load the .DO file into Stata and then submit it.

If the \*.DO and \*.DCT files are located in "c:\cams2019\stata" and the data file is located in "c:\cams2019\data", you can run the .DO file as is.

If the files are not located in these directories, you must edit the \*.DO and \*.DCT files to reflect the proper path names before you run the files.

Note that the variable names provided in the .DCT files are uppercase. If you prefer lower case variable names, you may wish to convert the .DCT files to lower case prior to use. You may do this by reading the .DCT file into a text or word processing program and changing the case. For instance in Microsoft Word, Edit, Select All, Format, Change Case, lowercase.

#### **4. Linking Respondents across Time**

Respondent records in the 2019 CAMS Final Release (Version 1.0) can be linked to respondent records from HRS 2018 and prior waves by HHID and PN.

For SAS examples of how to link CAMS data with the HRS Core, or cross-sectional data, refer Section 4 of the [2009 CAMS Data Description](#).

#### **5. Registration and Downloading the Data**

##### **5A. Registration**

HRS data are available for free to researchers and analysts at the HRS Web site. In order to obtain public release data, you must first register at our Web site. Once you have completed the registration process, your username and password will be sent to you via e-mail. Your username and password are required to download any data files.

By registering all users, we are able to document for our sponsors the size and diversity of our user community allowing us to continue to collect these important data. Registered users receive user support, information related to errors in the data, future releases, workshops, and publication lists. The information you provide will not be used for any commercial use, and will not be redistributed to third parties.

##### **5B. Conditions of Use**

By registering, you agree to the [Conditions of Use](#) governing access to Health and Retirement public release data.

##### **5C. Publications Based on Data**

As part of the data registration process, you agree to include specified citations and to inform HRS of any papers, publications, or presentations based on HRS data. Please send a copy of any publications you produce based on HRS data, with a bibliographical reference, if appropriate, to the following address:

**Health and Retirement Study  
Attn: Papers and Publications  
The Institute for Social Research, Room 3410  
P.O. Box 1248  
Ann Arbor, MI (USA) 48106-1248**

Alternately, you may contact us by e-mail at [hqsquestions@umich.edu](mailto:hqsquestions@umich.edu) with "Attn: Papers and Publications" in the subject line.

## **6. If You Need to Know More**

This document is intended to serve as a brief overview and to provide guidelines for using the CAMS 2019 Final Release (Version 1.0) data. If you have questions or concerns that are not adequately covered here or on our Web site, please contact us. We will do our best to provide answers.

### **6A. HRS Internet Site**

Health and Retirement Study public release data and additional information about the study are available on the Internet. To access the data and other relevant information, point your Web browser to the HRS Web site.

<http://hrsonline.isr.umich.edu/>

### **6B. Contact Information**

If you need to contact us, you may do so by one of the methods listed below.

Internet: Help Desk at our Web site

E-mail: [hqsquestions@umich.edu](mailto:hqsquestions@umich.edu)
