After requests from several users, we are re-releasing archived versions of the RAND HRS Longitudinal File and the RAND HRS Detailed Imputation File to promote data transparency and reproducibility of research studies. **As always, we strongly recommend that users download the latest version of all RAND HRS data products for new and continuing research projects**. For up-to-date information on all data releases, visit our website at https://www.rand.org/health/surveys/hrs/hrs-data.html.

Since the initial release of some of these files, data permissions and use agreements have changed. As a result, we have removed the following variables from the datasets, even though they appear in the accompanying documentation:

- RwIMPUTE
- SwIMPUTE
- RANDATE, RANDATEF, RANMONTH, RANSCORE, RANYEAR
- SwNDATE, SwNDATEF, SwNMONTH, SwNYEAR
- RADDATE, RADDATEF, RADMONTH, RADYEAR
- SwDDATE, SwDMONTH, SwDYEAR
